Stamp 1G Dependent Visa — No Sponsorship Required

PROFESSIONAL SUMMARY

Data Analyst with an MSc in Data Science for Management and a foundation in Computer Science. Experienced across the full analytics and data science lifecycle — from exploratory data analysis (EDA), feature engineering, and statistical modelling through to model deployment, programme evaluation, and executive-ready insight delivery. Skilled in Python, SQL, Power BI (DAX, Power Query), scikit-learn, and SPSS, with hands-on delivery of end-to-end pipelines, predictive models, and interactive BI dashboards that support evidence-based decision-making. Comfortable working with Git/GitHub for version control and collaborating within multidisciplinary technical teams. Based in Dublin; no visa sponsorship required.

EXPERIENCE

Retail Assistant

May 2026 – Aug 2026

Primark | Dublin, Ireland

- Delivered consistent, friendly customer service on a high-volume retail floor, handling transactions and customer queries across multiple areas including till operations and fitting rooms.
- Collaborated with a large, rotating team during peak trading periods, adapting quickly to shifting priorities and developing strong communication and interpersonal skills in a fast-paced environment.
- Built confidence in stakeholder communication and professional conduct, transferable skills directly applicable to client-facing roles in data and business analysis.

Technical Skills: Customer Service, Team Collaboration

Reservation System Analyst (Maternity Cover)

Aug 2025 – Jan 2026

City Break Apartments | Dublin, Ireland

- Maintained and updated booking data within the reservation system, ensuring accuracy across pricing, availability, and inventory to support operational reporting and data-driven decision-making.
- Analysed recurring customer enquiry trends, combining qualitative review of enquiry themes with quantitative reporting to inform service quality improvements and stakeholder presentations.
- Collaborated cross-functionally to resolve escalated issues, improving process efficiency and contributing to automated reporting workflows.

Technical Skills: Reservation Management System, MS Excel, Data Reporting

Data Analyst Intern

Oct 2024 – Dec 2024

MDB Financial Consultancy Ltd | Catania, Italy

- Built and maintained CI/CD pipelines to automate deployments to Firebase and Google Cloud, delivering production-ready automated workflows.
- Managed GitHub version control ensuring structured collaboration and code integrity across team analytical workflows.
- Automated data processing pipelines using Python and GitHub Actions, reducing manual reporting effort.

Technical Skills: Python, GitHub, CI/CD, Firebase, Google Cloud Platform, Data Automation

Data Analyst Intern

Dec 2022 – Jun 2023

ST Microelectronics Srl | Catania, Italy

- Conducted exploratory data analysis (EDA) on complex structured and unstructured datasets using Python and R to uncover patterns and support risk-informed decision-making.
- Performed feature engineering, data preprocessing, transformation, and validation to ensure data quality and accuracy for AI-driven applications, applying scikit-learn for statistical modelling.
- Developed MATLAB-based reporting tools for video magnification data, enhancing stakeholder visibility of subtle trends and delivering executive-ready insight summaries.

Technical Skills: Python, R, MATLAB, Statistical Analysis, EDA, Feature Engineering, scikit-learn

KEY PROJECTS

Ireland HSE Outpatient Waiting List Evaluation & Forecasting Dashboard

2026

- Designed and deployed an end-to-end evaluation and analytics pipeline on 1,944 HSE records across 44 hospitals using PostgreSQL; conducted EDA and root cause analysis, identifying St. Columcille's as the highest-risk hospital nationally (55% of patients waiting >18 months).
- Built a regression-based forecasting model (Python, scikit-learn) with feature engineering on 25 months of national health data, projecting patient volumes with quantified uncertainty — directly analogous to programme evaluation and outcome forecasting in a research/policy setting.
- Conducted trend and performance driver analysis revealing Ireland's waiting list grew by 62,917 patients (+11%) from 2024–2026, structuring findings as executive-ready insights for senior stakeholder reporting.
- Deployed a scalable, interactive Power BI performance dashboard with DAX measures, KPI cards, and drill-through reports, enabling non-technical stakeholders to self-serve data-driven decisions.

Technical Skills: *Python, SQL, PostgreSQL, Power BI (DAX), scikit-learn, Feature Engineering, EDA, Excel*

Deep Learning Pipeline for Medical Image Classification — Pneumonia Detection

2025

- Designed and implemented an end-to-end deep learning pipeline for pneumonia classification from chest X-ray images; applied feature engineering, data augmentation, and SMOTE for class balancing on unstructured imaging data.
- Fine-tuned VGG-16 and ResNet-50 architectures on real-world clinical datasets, delivering model evaluation and performance benchmarking across imbalanced classes — demonstrating the full ML development lifecycle from data curation to deployment-ready output.

Technical Skills: *Python, TensorFlow/Keras, CNN, VGG-16, ResNet-50, SMOTE, scikit-learn, NumPy, OpenCV*

Medicare Drug Prescriptions & Cost Analysis

2025

- Analysed prescription costs, demographic disparities, and public health trends from 2023 Medicare Part D data; built ETL pipelines and Power BI dashboards to visualise scalable KPI solutions across drug classes and provider demographics.
- Generated ad-hoc analytical reports and executive-ready commentary on scheme performance trends for non-technical stakeholders.

Technical Skills: *Python, Pandas, ETL, Power BI, MS Excel*

Renewable Energy KPI Dashboard

2024

- Developed an interactive Power BI dashboard for wind and solar plants using advanced DAX; built drill-through reports and heatmaps to uncover correlations between weather variables and power generation for data-driven operational decisions.

Technical Skills: *Power BI (DAX, Power Query), Excel*

TECHNICAL SKILLS

Data Science & Analytics: Python, R, MATLAB, SQL, EDA, Feature Engineering, Statistical Modelling, Predictive Modelling, Machine Learning (scikit-learn, Pytorch, NLP, TensorFlow/Keras), Hypothesis Testing, Regression Analysis, Time Series Forecasting

Business Intelligence: Power BI (DAX, Power Query, Data Modelling), Tableau, Interactive Dashboards, Stakeholder Visualisation, Executive Reporting

Data Engineering: PostgreSQL, ETL Pipelines, Data Transformation, Automated Workflows, CI/CD (GitHub Actions), Firebase, AWS, Azure

Tools & Platforms: MS Excel (Advanced), Git/GitHub, Google Cloud Platform, MATLAB, React, Tailwind CSS

EDUCATION

MSc Data Science for Management Oct 2020 – Dec 2023

University of Catania, Italy

Modules: Statistical Analysis, Predictive Modelling, Data Visualisation, Business Intelligence, Machine Learning, Database Management

BEng Computer Science Aug 2015 – Apr 2019

APJ Abdul Kalam Technological University, India
